"**Successful people have the global mindset to achieve immense in life.** The global presence is highly significant for every student to comprehend the interconnectedness of people, education and business across the globe that eventually leads to global, cultural, political and economic integration. It is the privilege one gains to move and communicate easily with others to value the cultural background behind religion, war, terrorism and more before one can make a knowledgeable verdict. My wishes are with **Techno India University as an internationally acclaimed institution to enrich their broader reach from the local to the global.** A platform is required to understand the global marketplace that has the skills to work. Many international companies have identified the need for a workforce that has the skills to work cross-culturally, identify, and serve the needs of a global market. More global education programs, workshops must be appreciated to increase visibility of the institute with an assortment of subjects on the serve. I strongly support the global presence of the university and wish everyone to expand, evolve and explore for the enhanced vision.

Manoshi RoyChowdhury
Co-Chairman, Techno India Group
